

I do not believe that allowing Low Power FM stations to have priority over existing FM stations will be beneficial to me, a listener of nationally sponsored stations. As a listener of FM radio, I have the right to have a say in what happens to my stations. You are jeopardizing my radio programming options. K-LOVE radio offers programming that is completely listener supported. We prefer to have the opportunity to hear about local activities sponsored by worthy causes, at no charge to them. If I am no longer able to listen to K-Love as I travel the country I will be a very unhappy listener. I am not sure if you have ever driven across Texas, but there are not a whole lot of choices for radio programming in many areas. Please do not remove the one choice that is available that actually stands for something decent. This station provides a public service to the community in its programming by promoting family values, encouraging families to adopt children and be involved in making a difference in their respective communities. I am a supporter of this kind of radio station and encourage my family to listen also, throughout this nation. Every where I travel, I can have this station with me.
